

Urban Futures Symposium | 21 – 25 August 2023

Candidate: Yukun Zang

School: School of Property, Construction and Project Management

Presentation: Second Milestone Review

Title: Investigation of fire safety strategies of buildings with BIPV external walls

Abstract:

With seven years of extensive experience as a Building Service Engineer, I possess a comprehensive skill set to design and document wet and dry fire systems across various building projects. I have a strong familiarity with the relevant standards in fire safety engineering, including the Australian Standard and National Construction Code (NCC), ensuring compliance and adherence to regulations. Additionally, I am highly proficient in utilizing AutoCAD and Pyrosim for schematic design and analysis, further enhancing my capabilities in this field.
